Schilli Implantology Circle Cooperation

Dear partners and friends,

Implantology has changed dentistry. It is, like the surgical joint replacement, a product of modern bone surgery. In 1958, this was completely restructured by the Arbeitsgemeinschaft für Osteosynthese (AO = Association for the study of osteosynthesis). Their rules also apply to us: the biomechanical principles of function provide orientation, the vitality of the bone must be preserved. The aim is the most atraumatic surgical procedure possible.

Incorporation of an implant is a biological process, and we must provide the requirements for it to take place smoothly. Every detail of our approach is therefore important. The procedure is optimised and errors are avoided by providing clear surgical protocols. But despite all the schematic optimisation every case remains an individual case. This applies in particular for the subsequent prosthetic restoration. When prosthodontics cooperates with surgery, prosthodontics dominates as it determines the function and aesthetics.

We are, as are the members of the circle, very enthusiastic about implantology and want to improve the process and product through discussions with competent specialists. Disadvantages and faults as well as possible improvements and prospects are discussed at regional and an international level and scientific investigations and checks are initiated. Organisation and trust are therefore prerequisites for ensuring that everyone profits from this approach and that we can provide our patients with even more reliable and better help.

Sincerely
Prof. Dr. Wilfried Schilli

Founding Member Schilli Implantology Circle

Dear partners and friends,

10 years ago, my father and I decided to found SIC invent. What began with a Swiss corporation became a globally active company group. The concept for success is based on our company slogan "Implants from Implantologists".

The SIC "Schilli Implantology Circle" was founded at the same time as the SIC invent group. This is an internationally organised network of opinion leaders and users of the system, jointly responsible for a high-performance SIC invent product portfolio and its reliable application on patients, based on a worldwide continuous training concept.

At this point, I would like to express my sincere gratitude to all SIC members. Without this "Think Tank" and user-oriented advisory group, a premium product and training portfolio would not be possible.

Let us inspire and convince you in the future with our product innovations and optimisations because:

The status quo is only a stop-over on our way to perfection in dental implantology.

I would like to thank you at this stage for the confidence you have placed in us and I look forward to being able to meet the challenges of the next 10 exciting years together with you!

Sincerely
Georg Schilli
